🔥 FIREWISE-X — 30-Second Global Submission Pitch

NASA International Space Apps Challenge 2026 | Challenge: Flame in Freefall

Target Duration: 28–30 Seconds | **Team:** Unobtanium (Mymensingh) | **Format:** 1080p 16:9 MP4 | **Verified Run:** BASS-II Test B1 / Sample 147

🎬 **Pitch Contract (Strict 30s):** One question, one test, one verified source. Opens with the core research question, shows the B1 observation and verified Table A.1 citation in one unbroken chain of evidence.

TIMECODE	VISUAL SCREEN & EDIT ACTION	ENGLISH SPOKEN NARRATION
0:00 – 0:06 (6s)	**Opening Hook & Question** Show verified B1 flight frame. Display concise title text: *"What happened when airflow stopped in one ISS flame test?"*	"What happened when airflow stopped in one ISS flame test?" *Pacing: Clear, questioning, steady hook.*
0:06 – 0:12 (6s)	**Team & Project Identity** FIREWISE-X & Unobtanium title badge (2s). Smooth zoom into B1 card on the live interface.	"We're Team Unobtanium. FIREWISE-X links experiments to their NASA evidence." *Pacing: Confident and direct.*
0:12 – 0:20 (8s)	**Ground Truth Observation** B1 / sample 147 / 100 µm thin PMMA / opposed flow. Highlight NASA Table A.1 row in memorandum.	"In BASS-II test B1, NASA reported rapid visible flame extinction after airflow stopped." *Pacing: Technical clarity, highlighting Table A.1.*
0:20 – 0:27 (7s)	**Traceability & Verification** Open exact report locator (NASA/TM-20210011385, p103). Show verified clip and evidence panel.	"Open the run, check the source, and see which conditions the result applies to." *Pacing: Inviting judge verification.*
0:27 – 0:30 (3s)	**End Card & Attribution** End card: **FIREWISE-X · Unobtanium · Flame in Freefall** . Source credits: NASA BASS-II PSI-25 · Table A.1.	*[Voice finishes at 0:27; allow 3 seconds of silent reading for the end card and official DOI.]*
